

## VECTR SOLUTIONS ADVISORY SERVICES

### Discovery

We help teams assess their current landscape, identify gaps, and define clear goals, ensuring a well-architected approach before implementation begins.

### Design

Our experts guide teams in structuring scalable, compliant, and efficient Salesforce solutions, aligning best practices with business objectives and regulatory requirements.

### Oversight

We provide strategic oversight throughout implementation, ensuring proper sequencing, mitigating risks, and keeping projects aligned with intended outcomes and compliance standards.

### Timeline & Cost

We align timelines to your need based on project goals and scope. Our cost is determined by a flat expert rate for the duration of the project.

## Experienced Architect providing expert guidance to **optimize** and **secure** your Salesforce solution.

Self-implementing Salesforce can be complex and requires expertise in compliance, security, and architectural best practices.

Without seasoned guidance, organizations increase the risk for data slippage, technical debt and challenges on the Salesforce solution.

Our architects have years of hands-on experience in federal and enterprise implementations. Our architects don't just build—we provide technical leadership, ensuring that our solutions are secure and scalable.

Our Advisory Services offering provides strategic expertise delivered by a Salesforce Architect. Our Architects advise on security design, migration approach, integration patterns and development best practices.

Our proven leadership accelerates deployment, enhances security, and maximizes your Salesforce investment.
